

P series VSI crusher

P series vertical shaft impact crusher, known as sand making machine, is designed on the basis of mining equipments, combining the working principle of the Barmac vertical shaft impact crusher. It is widely used for fine crushing of various kinds of mineral, like quartz, steel grit, fireproofing material, cement, copper ore, gold mining, slag, pebble, aggregate, asphalt etc.. It is a energy-saving sand making machine. At present, it has already replaced the hammer crusher, roll crushing mill etc., becoming the core equipment of sand making.

Features of P series VSI crusher:

1. simple structure and low operating cost
2. It is used for fine and coarse crushing. The consumption is low capacity is high, and crushing ratio is big.
3. The equipment occupied a small area, the impeller is of little wearing. It is of easy operation and maintenance.
4. Humidity had little influence to the production capacity, the humidity can reach 8%.
5. The machine has the function of shaping. The final products is of good cubic shape, and the iron containing is little.
6. It is especially suited for crushing material of hard and medium hardness.
7. The wearing part is made up of ultrahard anti-friction material. The size is small, weight is light, and is easy to change the parts.
8. Low noise below 75 db, little dust.

Technical Parameter Of P series VSI crusher

Kefid Machinery (Zhengzhou) Co.,Ltd

Model	Rotate speed of impeller (r/min)	Max feed size (mm)	Power (kW)	Weight (including motor) (t)	Capacity (t/h)	Overall dimensions (mm)
P-600	2000-2600	30	2×30	5.6	10-30	2800×1550×2030
P-750	1600-2100	35	2×45	7.5	30-50	3300×1800×2440
P-900	1300-1700	40	2×55	12	50-80	3750×2120×2660
P-1050	1100-1450	45	2×110	16	70-120	4480×2450×2906
P-1250	950-1200	45	2×132	22	80-150	4563×2650×3176
P-1350	800-1200	50	2×160	26	120-200	5340×2940×3650

Note: Any change of **P series VSI crusher** technical data shall not be advised additionally.
